

## 1. What are idle multipliers ?

- > Multipliers multiply your applied prestige
- > Nu. of multipliers are shown in the little bubble over the prestige button
- > They can be accumulated but all will be used in the first prestige reset
- > If you have any multiplier, offered prestige will be min '1'

## 2. How do we get multipliers ?

- > Multipliers accumulate in your 'idle' time. The more you stay off the game the more multipliers you'll have
- > Minimum 'idle' time to start getting them is 10 minute. No increasing effect after 10 idle days.

## 3. How it is calculated ?

**More Idle Time = More Multipliers**

- > Multipliers are calculated in direct relation to how many hours the player is away from the game.

## 4. Table of 'Possibilities'

if idle longer than...	10 min	1 hour	24h	2 days	3 days	4 days	10 days
regular mod	x2	x4	x12	x24	x48	x120	x480
sleeper mod	x2	x16	x48	x96	x192	x480	x2K

## 5. Connection Errors

- > Multipliers are calculated only if the player is online
- > If you get a 'slow connection' error just try to restart the app to reclaim your multiplier
- > In case the player was offline and skips a multiplier reward, earnings will be accumulated for the next session when the device is back online
